Project Description

Project Title	"Home Security Using Face Recognition with GSM Interface"
Team Size	4 Members
Test Done	Unit Testing, User Integration Testing.
Work Done	Writing Test Cases, Execution of Test Cases
Description	Security systems are important features of a modern home. Home Security has been a major issue where crime is increasing and everybody wants to take proper measures to prevent intrusion. In addition there is a need to automate home so that user can take advantage of the technological advancement in such a way that a person getting off his home does not need to think of his/her home security again and again The project "Home Security Using Face Recognition with GSM Interface"has been designed considering people needs to monitor home at people absentees. If unknown person tries to enter home at absentees of people, system will take action within few seconds and alert user through the SMS (Short Message Service).
